

“The Branches Network”- Grenverket

female forest owners in Blekinge

Welcome to the Branches Network!

We are an independent association of women interested in forestry, based in the county of Blekinge in SE Sweden.

We want to bring out the women to take part in decisions in the family forestry.

We also want to encourage young woman to take interest in forestry studies.

We provide education in forms of “study-circles”, excursions and so on to give women chance to study in community with other women

Each year we choose “the forest woman of the year”, to encourage and inspire other women.

We support and take an active part in rural development activities, in co-operation with other organisations in the region.

We spend a lot of pleasant, stimulating and instructive time together!

All women are welcome, with or without experience and knowledge of forestry!

Welcome to our web site www.grenverket.se
